Module Overview

Azure Dashboard overview

Creating and sharing dashboards

Multiple Metrics

Often a solutions comprises of multiple resources

Even for a single resource there may be multiple metrics you wish to see

Multiple metrics can be added to a single Metrics Explorer instance

Azure Portal Dashboards

Dashboards can be created to bring together information related to a desired view

Often can pin results from metrics, log queries directly to dashboard

Can also include elements such as markdown text and resource graph results

Dashboards can be published and shared with their own RBAC
